

One platform for small business owners to communicate with clients, manage business information and simplify their sales.

At a Glance

What we do for you

- Setup your website presence, and connect your Facebook and Twitter to your presence.
- Setup and train you how to use email from desktop and mobile.
- Host online webinars and create how-to-videos to help you manage your presence and communicate with your clients.
- We will get in touch with you every four months and update your presence.
- Provide support via email and phone.

Simply put...

- Your Website will not get out of style, the information is updated regularly and you have a helping hand one email away!

Our Focus is Small Business.

We exclusively work with small business owners and understand their pain. Our platform and services reflect 12 years of experience in helping small businesses like yours adapt and succeed in the ever changing marketplace.

SOLO combines everything you need to maintain a strong digital. You benefit from our "brand management" service to maintain your business and brand information up to date.

This service includes a **Professional Setup** of your presence, where we interview you and use the information to setup everything needed.

On top of your ability to change content on your website 24/7, we **review your website three times a year**, add new

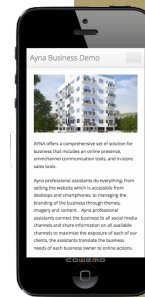

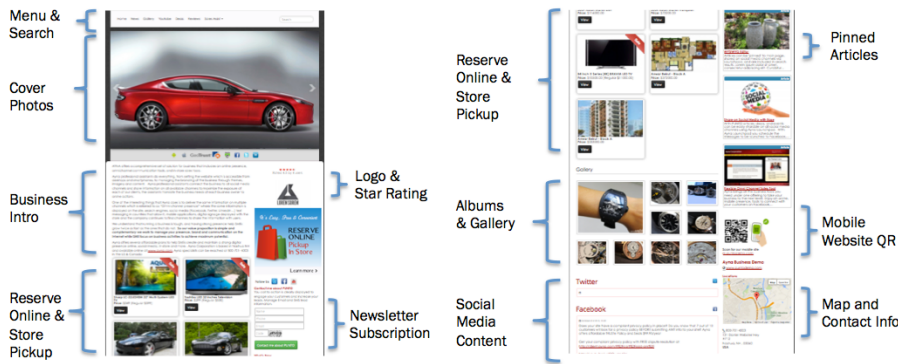

SOLO's Brand Management service keeps your website updated and looking great!

features that we developed during that time and update your business information to keep your brand fresh.

You also **receive email support** and invitations **to attend training webinars**.

Do you have questions about what tools to use for business? Try our support; we can advise you on tools that fit your needs.
